One of the most common questions I hear is how to start a side hustle when you don't have any good ideas.

Here are multiple ways you can make extra money legitimately. Some of these are legit work from home jobs where you can work online.

Some of them can make you money fastest way but some might require you to do hard yards. You can treat yourself with that money or save it for the future.

You need to identify what is that you are good with. Maybe you still don't know and need to figure it out. This is a list of a variety of skills you can consider. Pick one or a few and start making extra money on the side today. Once you get a nag of that you will be addicted.

These side hustle ideas don't require a huge initial investment or even necessarily a highly specialized skill-set but each one has the potential to earn you money in your spare time.

1. **Blogging.** You can't have a list of online side hustles ideas or ways to make money from home that is complete without mentioning [starting a blog](#).

The reason it's first on this list is because it's my favourite side hustle. From my experience of years hustling this one have paid highest dividends.

Blogging has gotten a bad name because the people promoting it as a side hustle want you to believe it's super easy to make \$100,000 a month online so that you'll sign up for their hosting affiliate or their latest "blogging secrets" course.

The truth is that **blogging is extremely hard work**. Unlike freelancing or other "easy" ways to make money online, you won't see a return from blogging for 6-12 months or even more.

Few lucky and smart ones can make in three months.

Blogging won't make you money quickly in one day.

This is NOT a get rich quick scheme. Not even close.

I would say you need to be willing to blog for free for AT LEAST few months before having any expectations of making a profit.

It's kind of like rolling a snowball down a hill, it takes a lot of work at the beginning, but once it picks up momentum it almost runs on its own.

Once you get to this point, you can make \$1,000 a month, \$10,000 a month, even \$100,000 a month while working less than you did at the beginning!

If I can earn \$2500 as a side hustle from a blog then anyone can do that.

[Read on to know how I did it.](#)

Delivering pizzas have given even full-time livings to many. You too can try it as a side hustle.

With services like UberEATS and Door Dash you can earn money on your own schedule delivering take-out orders in your town ... and you don't have to worry about keeping your car super clean for passengers.

3. Customer Interviews.

If you want to know how to make quick money in one day (\$100 or more), this is the perfect place to start without much experience or skills!

You can share your opinion in focus groups. Companies are looking for qualified people to join their research studies, and you don't necessarily need to be a professional to participate.

This is how it works:

1. You apply to participate in studies that you think are a good fit for you.
2. The researcher/sponsor of the study reviews responses and sends invitations to the best-fit respondents.
3. If you receive an invitation to participate, you choose a time that suits you from those made available by the researcher.
4. After you have completed the study, you are paid via PayPal, cash, or Amazon gift cards.
